

PCM110303 Track Ride Tower

Gliding through the air on a wire is immense fun for school age kids. The Track Ride Tower allows for the weightless feeling of gliding at the speed, you can make, through the air. Apart from being great fun and holding the basic attraction of being a moveable play unit adding speed to the movements of the children, the Track Ride is also a substantial piece of training support: the children train their arm, leg and core muscles when flipping their bodies to go back and forth. They train their bone density when jumping down from the handholds. Last, but not least, they train their motor skills, among others their agility, balance and coordination.

Product Line	Traditional Play
Category	Supernova, carousels & spinners
Age group	6 - 12
Max. fall height (CM)	118
Total height (CM)	260
Safety Zone	34.1 m ²
