The home-themed Playhouse with Desk will attract and excite toddlers again and again. There are three extra features that greatly increase their desire for playing: The scale of the house is perfect for toddlers. The openness under the desk adds to the overall transparency, and children can play together from the outside and the inside of the house.

The ground level play makes it possible for all children to play here. The openness of design allows for looping around, into and out of the house repeatedly. Having a meeting point like the house allows for social interaction and the children's first group-play with friends. Having sheltered, easily accessible meeting points like the Playhouse with Desk can be the start of a

life long friendship with peers from the nursery.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
