WOW! Once they try it, children don't want to stop: the sensation of combined rotation and rocking is so much fun. It is great, challenging balance and proprioception training for older children to manage the rotating rocker. The distance to the ground makes it a pretty conscious choice whether you think you can stay on the Wacky Spinner once it starts

rotating and rocking. But for less skilled balancers, there is a possibility to sit, or lie, on the slightly curved rubbery surface. More children can be seated back to back, or stand close together and rotate and rock. This encourages cooperation and turn-taking. When placed more together, the Wacky Spinners invite games with rules, e.g. who can stay the

longest. Knowing how to position your body to stay on the Wacky Spinner trains movement planning which is important for instance in sports.

Lower base plate is made of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material.

Upper plate is made of Ekogrip® panel that consist of a 15mm thick PE base with 3 mm top-layer of soft rubber with a non-skid effect.

Heavy duty engineered bearing system with single row deep groove ball bearings with rubber seals. The fully closed bearing construction is lifetime lubricated and maintenance free. The Bearing system has an integrated drag brake according to global safety standards.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with lowest possible CO2e emission factor such as EcoCore™ panels of 100% post consumer recycled ocean waste.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
