

Everest is an awesome, thrilling ramped play unit that makes children want to come back again and again thanks to its vast variety of fun play opportunities. The physical, social-emotional and cognitive skills of children are trained when bouncing, climbing, sliding, swaying and gliding the Everest. The rich access climbers build cross-coordination and a sense of balance and space, and the varied gliding and sliding egresses add thrills. This makes the Everest a trainer of the ABC of motor skills, agility, balance and coordination. These, among others, build the fundamental skills for navigating traffic safely. At ground level, swaying and bouncing meeting points are found at both ends, one hidden under a platform, one radiating out from the lower part of the ramp. All in all, Everest is the peak of play for all the older children.

Product Line	ELEMENTS™
Category	ELEMENTS™ GO
Age group	4+
Max. fall height (CM)	273
Total height (CM)	553
Safety Zone	225 m2

* = Highest designated play surface.
** = Total height of product.

Weight/heaviest parts	kg.	Installation (Manpower)	Persons
Concrete required	NaN m3	Installation (Hours)	Hours
Foundation amount/footing	NaN	Excavation	NaN m3
